

# Fall Protection Training

OSHA requires that employers provide training for each employee that may be exposed to a fall hazard. Falls are a leading cause of construction related deaths each year and an average of over 4,000 OSHA Citations are issued to employers each year for the lack of protecting employees from a fall. Achieving fall protection calls for basic training for employees, constant vigilance from supervisors, and the use of protection systems.

## Course Description:

At Safety Equipped, Inc., we believe that the best way to be certain that a fall does not occur is through employee fall hazard awareness and taking the steps to prevent a fall from occurring at all.

This course consists of classroom study identifying fall hazards and methods of preventing falls, hands on demonstration of fall protection equipment including function, inspection and implementation of fall protection systems, interaction with students demonstrating the various fall protection systems, and a written test to evaluate student competency.

**Minimum Class Size:** 10 students

**Maximum Class Size:** 20 students

**Cost:** Call for Pricing

## Training Objectives:

Some of the course objectives are:

- How to recognize and be aware of a fall hazard in the work place.
- What basic fall protection systems are available to prevent a worker from falling.
- How to use the varied fall protection systems available to workers.
- The proper inspection of fall protection systems once in place.
- An understanding of the OSHA requirements for fall protection in the workplace.
- The importance of rescue provisions available in the event of a fall.
- An understanding of the hazards of suspension trauma.

## Training Goal:

The goal of providing this training is to contribute to the development of an overall workforce training program that will support a safe and productive workplace environment for your employees free of fall hazards.

At the conclusion of the course, each student will be issued a "Certificate of Completion" wallet card as proof of successfully completing fall protection training. OSHA requires that employers maintain records of employee training. The employer will receive the class attendance sheet(s), class evaluation forms and a copy of each students "Certificate of Completion" wall card to meet the OSHA requirements.
